

FRÜTEC – technical supply GmbH

Product Line

A vessel is like a self-contained city, providing everything needed for life on board—generating its own energy and water, managing waste, and more. Because of the diverse and specialized needs of each vessel or platform, FRÜTEC doesn't offer a fixed product line. Instead, we tailor solutions to meet your specific requirements.

Our specialties include sanitary, kitchen, and electrical spare parts, as well as air conditioning, water treatment, motor parts, hydraulics, pumps, and entertainment and fitness equipment.

Below is a selection of product groups we regularly supply, featuring brands commonly provided by us.
